

Introduction to Environmental Public Health Homework 2

What Does Science Tell Us About the Link Between Chromium 6 (CR-6) and Cancer?

Research studies and articles in journals and the news media throughout recent years and write an executive summary about your findings. We'll discuss your findings during our next class.

Questions to consider:

- How are individuals exposed to the hazard?
- Is human exposure being monitored? In what ways?
- Population characteristics to consider?
- What is the data source?
- How have the data been used to protect public health? If so, how?
- Have federal, state, or local laws been enacted as a result of data linking Cr-6 to health issues?
- Are there any surveillance systems with data on Cr-6?
- What do we not yet know about Cr-6?
